## ◦ SKILLS ◦

React  
Redux  
ES6+  
GraphQL  
HTML & CSS  
TypeScript / Flow  
Jest  
Enzyme  
React Testing Library  
jQuery  
Responsive development  
WordPress  
SASS/Stylus  
Styled Components  
Webpack  
Git

## 🏠 SUMMARY

As a motivated Software Engineer with 9+ years of experience, I am seeking a challenging position where my frontend knowledge can make a difference. I specialize in ReactJS.

## 📁 EMPLOYMENT HISTORY

### ○ Frontend Developer at Gooee, St Petersburg

April 2019 — May 2020

- Responsible for implementing AmCharts in the portal allowing for complex data visualizations of large data sets
- Implemented checks using Redux to help reduce unnecessary analytics calls to help save costs
- Worked with the Backend team to ensure successful releases of latest features
- Implemented Storybook with Knobs allowing use of dynamic data in our component library
- Used Jest and React Testing Library to ensure code coverage of new features

### ○ Frontend Developer at Mozilla, Remote

August 2019 — May 2020

- Assisted with some higher priority issues to help the project get into maintenance mode

### ○ Frontend Developer at Mozilla, Remote

April 2018 — April 2019

- Used React and Redux for the integration of a new extension theme type being rolled out throughout the site
- Implemented new guides page to help provide more information to users
- Implemented an A/B test which helped determine greater usability
- Reviewed coworker's and contributor's pull requests and provided appropriate feedback
- Used Jest and Enzyme to ensure code coverage of new features

### ○ Frontend Developer at NBCUniversal, New York

August 2010 — March 2018

Notable projects included various media brands such as Universal Kids, Chiller, Telemundo, Universal Pictures Home Entertainment, NBC.com, Oxygen Media, and USA Network. Many of the projects were initially set up using Waterfall and eventually we moved to using Agile methodologies for software development.

*Key projects Included:*

*Universal Kids, Chiller:* In a decoupled setup, I worked with the frontend team which would grab the data via a JSON API, and implement the visual designs using React and Redux:

- Implemented an HTML 5 video player to help engage users
- Ensured mobile first, responsive layout was successful on all designated platforms to maximize the site's users
- Optimized images for the different devices to help with performance
- Assisted in upgrading Webpack to help with performance

- Implemented as a single-page application (SPA) to enhance SEO and the user's experience

*Telemundo, USA Network, Oxygen Media, NBC.com, Intranet Publishing:* Collaborated with other team members to help build out different components to meet business deadlines:

- Used Drupal 7 theming to display the brand's media content
- Implemented a third-party integration tool (PatternLab) to help target out patterns so we could more easily reuse components
- Ensured responsive layouts and optimized images for the different devices to help with performance

*UniversalStudiosHollywood.com:*

- Assisted with building pages from templates using frontend technologies such as HTML, CSS, jQuery to implement the visual and behavioral aspects of the site

*MacTechLED.com, CES (internal) Blog, NBCUtech.com, NBCU Travel Portal:*

- Used WordPress to display the brand's media content
- Assisted with working on backend architecture such as field modifications to help extend WordPress' capabilities

## EDUCATION

 GS, University of Connecticut, Stamford
